

Dan:

The file on this issue is in Bob's office in the "Yellow" section:

-WDOE I-97

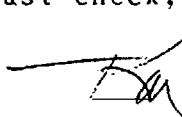

- State Waste Discharge Permit

These files contain relevant information. This is important because prior to 1989 we paid \$0 for this permit. I-97 changed all that.

As long as Stoneway uses our pond, they have agreed to share in the cost (excluding the permit application fee which is every 6 years I think and ours is still pending after 2 years). Livesay takes care if the split when the bill comes in. When Stoneway stops using the pond, as promised, their share will cease.

This is not to be confused with the City Storm Water Runoff fee which every property owner pays whether they discharge to Metro or not. Stoneway also shares in this because they are on our property records.

At last check, each billing is in the area of \$8K / year.
